Magic Ellipses Screensaver screenshots Magic Ellipses Screensaver Comments Most beautiful, colorful and gorgeous screensaver ever made 2006-11-15 17:05 Mathe I have tried about three hundred other screensavers, and this one is by far the best. To be more specific, I think this is the best screensaver for a reason. First of all, the concept is unique. This is definitely the first time I have seen someone create a screensaver that can be so much more than just a static image. When I start the screensaver, the ellipses start rotating, and this really adds a lot to the entire experience. I also really like the special effects that are created when two ellipses are touching or when they collide. These effects, combined with the rotating ellipses, create an amazingly interesting, unique experience. I am also a fan of the fact that the only "text" that is displayed is a small message that says "Press Ctrl+F12 to start or a press F12 to stop" (otherwise, you can interact with Magic Ellipses Screensaver, which I really like).
